Software developer with a solid technical background and strong passion for continuous learning and problem solving. Specialized in Full Stack Web Development with experience in building scalable applications, backend APIs, and responsive interfaces. Skilled in team collaboration, project management, and agile methodologies (Scrum).

EXPERIENCE

Oct 2024-Present

BIG Language

Project Management

- Led translation projects for a medical company.
- Defined project scope, objectives, and schedules.
- Assigned tasks, managed resources, and ensured stakeholder communication.
- Monitored progress, mitigated risks, and ensured on-time delivery.
- Produced final project documentation and process reports.

Tools & Skills: Agile Project Management, Risk Analysis, Communication, Team Leadership

March 2024 - October 2024

Vates

Software Developer

- Developed support applications for the Manufacturing area.
- Built a multi-insurance platform, handling backend logic and API development for data processing, storage, and retrieval.
- Designed and implemented unit tests to ensure code reliability.
- Collaborated with cross-functional teams under Scrum methodology.

Tech Stack: Node.js, React.js, Express, Sequelize, Tailwind, JavaScript, TypeScript, MongoDB, AWS

PROJECTS

March 2023 - December 2023

Final Grade Project: Web App for social events, including online sales tickets, events scheduling, listing promotions and selling credit for consumers during the events. The application also provides management information such as reports and statistics for the event organizers.

- Full stack development for the application.
- Design the architecture and components of the applications, considering both frontend and backend requirements.
- Design and set up the database schema.
- Create wireframes or mockups to visualize the user interface.
- Create user manuals and technical documentation for both users and developers.

Tech Stack: Node.js, React.js, Express, Sequelize, Tailwind, JavaScript, PostgreSQL, REST APIs
