### EXPERIENCE

2024-Present

#### BIG Language

Project Management

**Project:** Leading translations projects for a medical company

- Define project scope, set objectives, break work into tasks, and create timelines.
- Assign work to team members, manage resources, and facilitate communication between stakeholders.
- Track progress, manage risks, solve problems, and adjust plans when things change.
- Ensure the final output meets quality standards and is delivered on time.
- Wrap up documentation, review lessons learned, and hand over deliverables.

2024-2024

March - October

#### Vates

Intern

**Project:** Development of support applications for the Manufacturing area

- Development of a multi-insurance platform for the client.
- Build the backend logic and APIs that will handle data processing, storage, and retrieval
- Unit test development.

### PROJECTS

**Final Grade Project:** Web App for social events, including online sales tickets, events scheduling, listing promotions and selling credit for consumers during the events. The application also provides management information such as reports and statistics for the event organizers.

- Full stack development for the application.
- Design the architecture and components of the applications, considering both frontend and backend requirements.
- Design and set up the database schema.
- Create wireframes or mockups to visualize the user interface.
- Create user manuals and technical documentation for both users and developers.
